Social forefront

Promoters of digitalization

The Digital Agenda seeks to address the major challenges linked to the health and well-being of citizens, through the materialization of a 5P health model.

Purpose

Moving from a network of pharmacies to networked pharmacies, a smarter and more resilient model.

Based on technology to revolutionize pharmacy.

5P Healthcare

- Predictive
- Preventive
- Participatory
- Population-based

2021: Strengthening the value of our profession

The Pharmaceutical Profession during COVID-19: a network of professionals as a health and social shield

In public health

Through continuous monitoring of hygienic-sanitary conditions in coordination with the health authorities, controlling and managing risks.

In primary health care

Currently playing an important role in the distribution of vaccines within the health system.

Research and diagnostic support

Research into vaccines and new treatments

COVID-19 diagnostic tests in the Clinical Laboratory

Medicines manufacturing

Contingency plans in industry have increased plant capacity, reoriented production lines and ensured the supply of medicines.

Distribution of medicines

Guaranteeing the continuous supply of medicines, with quality and traceability.

At hospitals

Managing medicines supply incidents, with overstretched ICUs, participating in trials and seeking the best results from different treatments.

At community pharmacies

Ensuring medication for the entire population, caring for citizens during the crisis and increasing the health care and epidemiological capacity of the health care system.

Supporting citizens

Fighting against unwanted loneliness

Identifying people at risk of exclusion

Acting against gender violence

Pharmacy proposals: learning from the pandemic

We provide care

Setting up coordinated portfolio of Clinical Professional Pharmacy Services from the Community Pharmacy to contribute to the strengthening of Primary Care.

We are social

Taking advantage of pharmacy as a social ally for the fulfilment of the 2030 Agenda.

We are essential

Promoting integrated social and health care from rural pharmacies in areas affected by the demographic challenge

We safeguard patient safety

Collaborating in the development of a National Plan for patient safety in the use of medicines on the internet.

We are collaborative

Consolidating new working models and care circuits that promote and prioritize proximity and informed access to medicines for citizens.

We are specialized

Promoting the professional development of pharmacists by creating new specialties.

We are always watching for you

Integrating pharmacists and the Community Pharmacy in the strategies of public health and in the new public health surveillance system.

We are digital

Integrating pharmacists and the pharmacy network in the digital transformation of healthcare to improve the efficiency and quality of the NHS.

We are sustainable

Ensuring the sustainability of the Pharmacy Network to safeguard the Spanish pharmacy model.

We are efficient

Strengthening medicine manufacturing units in Hospital Pharmacy Services.
