2022 assessment of incidents in medicine supply

Antonio Blanes, Director of Pharmaceutical Services
General Council of Official Pharmaceutical Colleges

31 January 2023

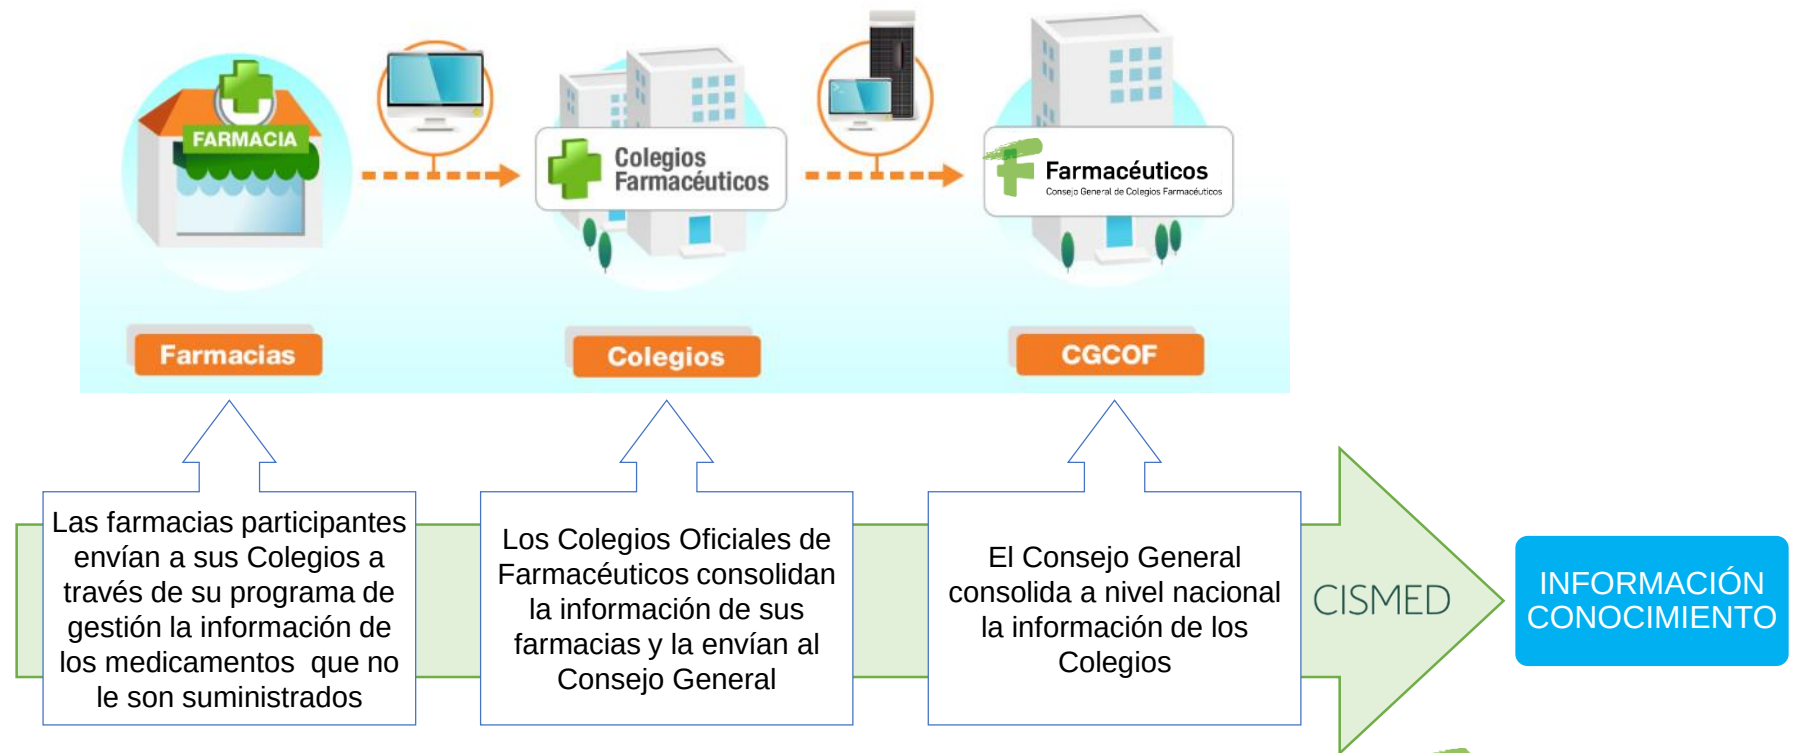

What is CisMED?

CisMED is a communications infrastructure that connects pharmacies, Colleges and the General Council

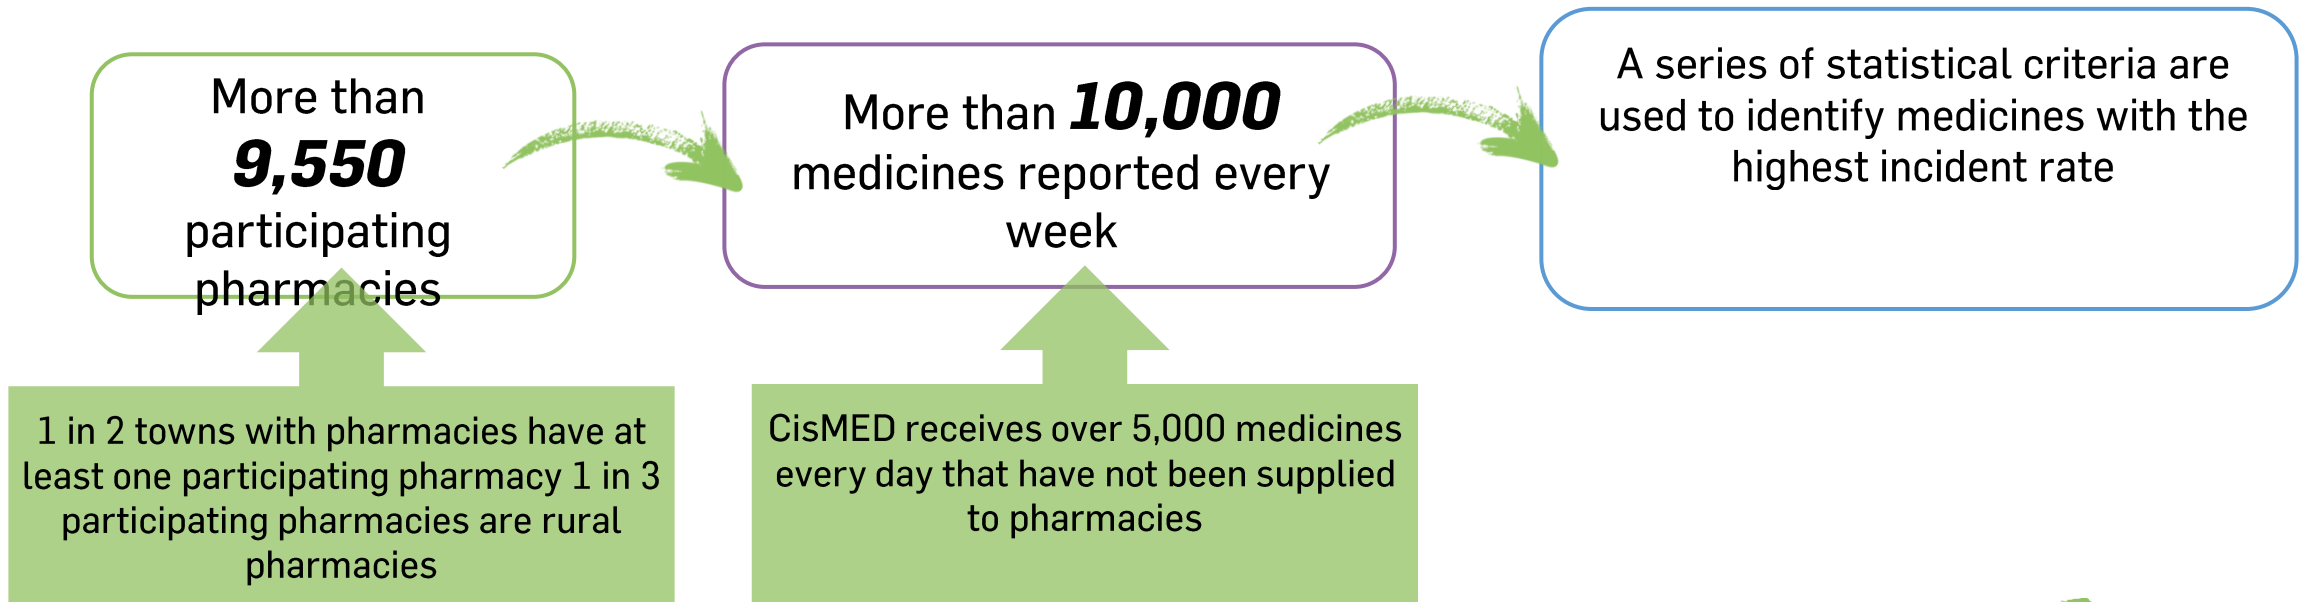

IT system that allows pharmacies to report medicine shortages

CisMED: Participation numbers

CisMED is an effective IT system used by many pharmacies

More than **9,550** pharmacies use it across Spain – **50%** of provincial pharmacies are registered. This figure keeps growing, helping us to eliminate barriers in reporting supply issues.

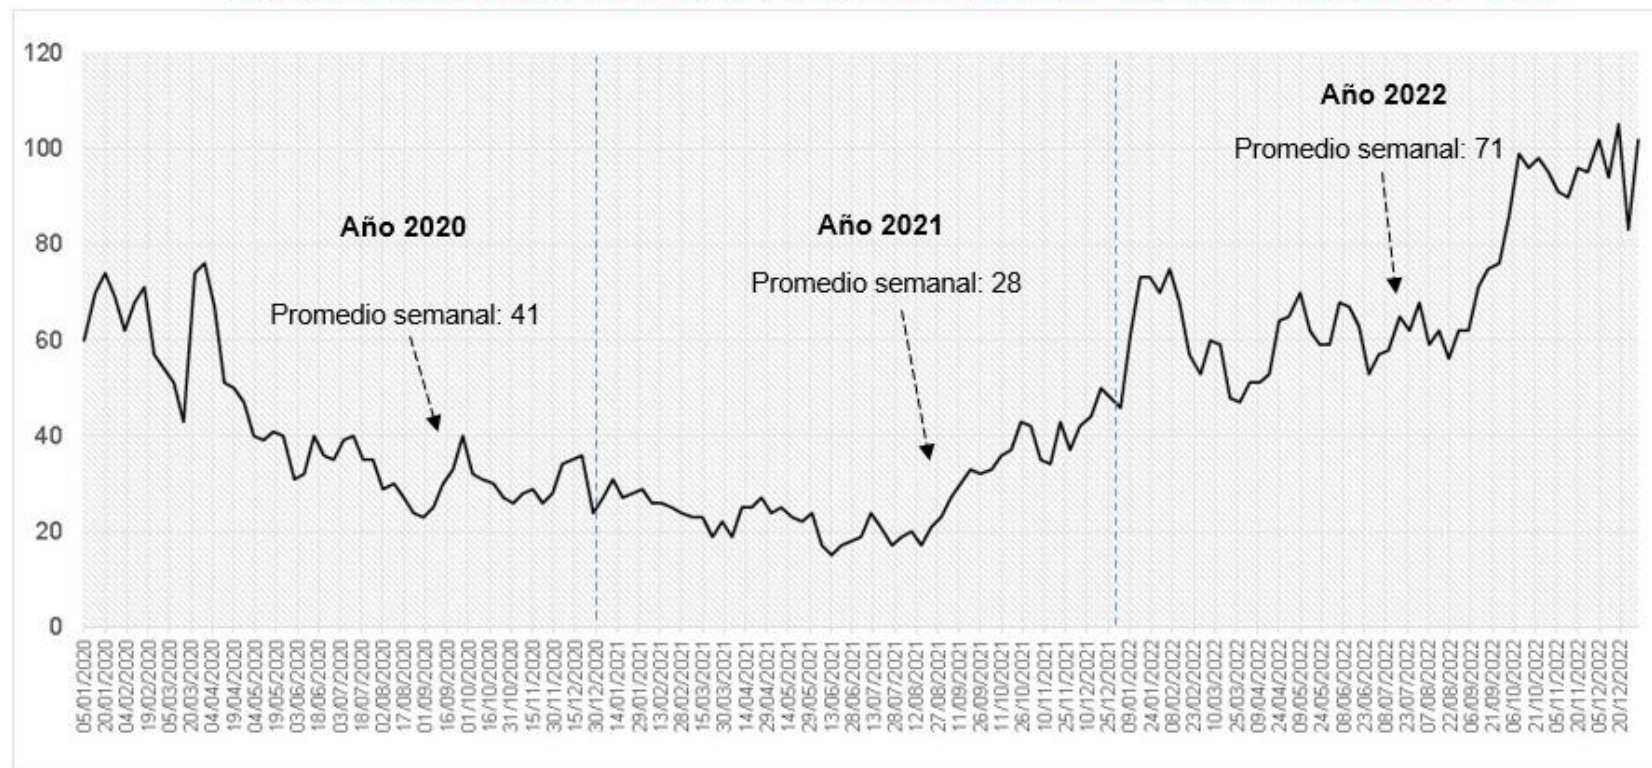

CisMED: 2022 supply incident data

In 2022, a total of 403 medicines were reported to have had a supply incident or alert

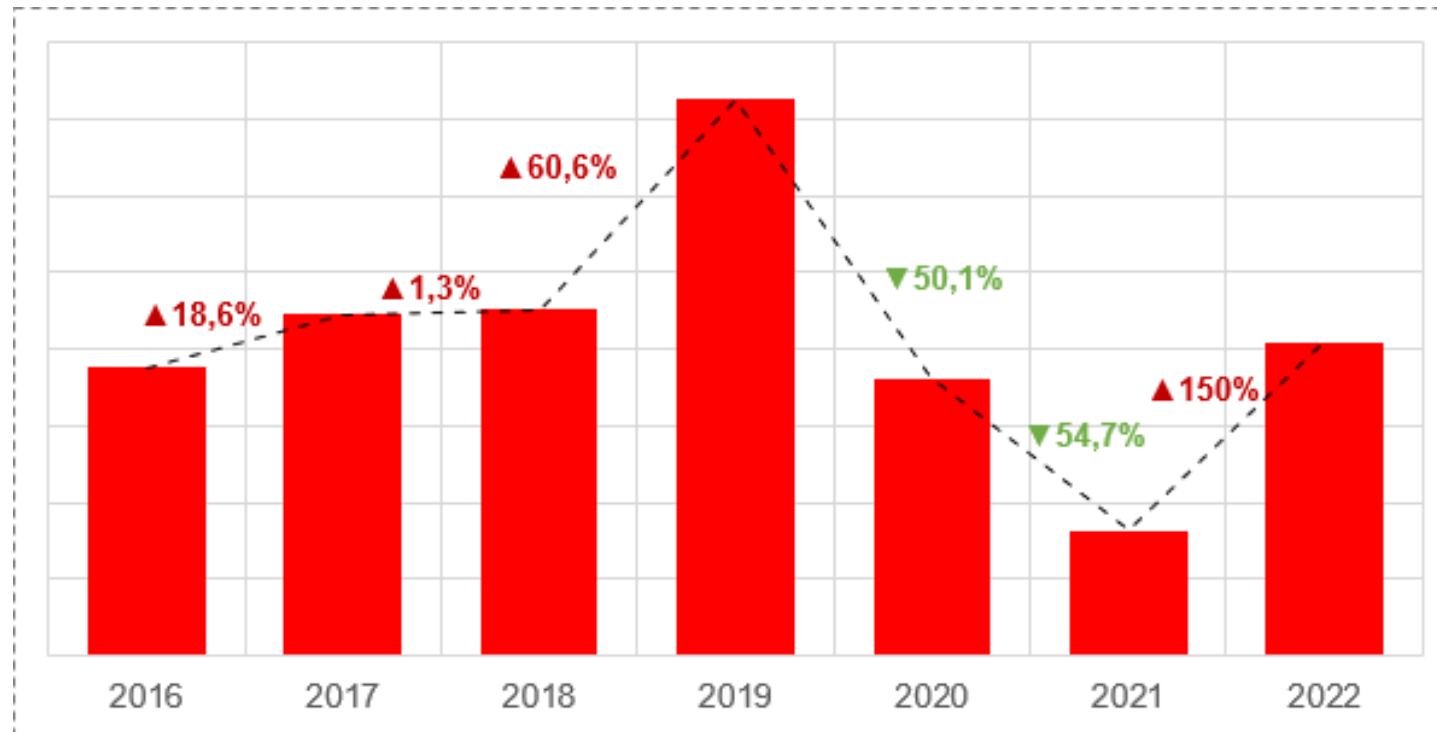

On average, over 70 medicines with significant shortages were identified every week, both at national and local level – 150% more than in 2021

Evolución semanal del nº de medicamentos con incidencias o alertas de suministro. Periodo 2020 – 2022

CisMED: 2022 supply incident data

2016-2022 trends

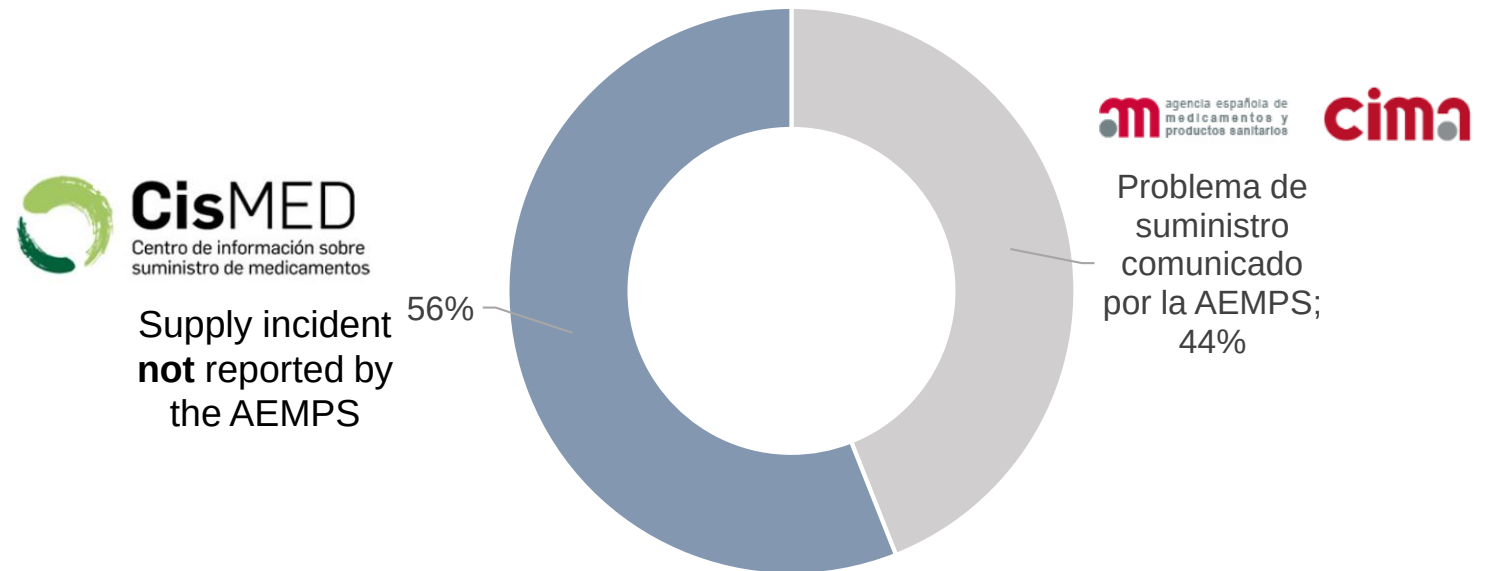

CisMED: 2022 supply incident data

CIMA-CISMED

More than half of incidents or alerts detected in CisMED were not supply issues reported by the AEMPS
Supply incident lasts between 4 and 5 weeks on average

Percentage of medicines with supply incidents or alerts reported by the AEMPS

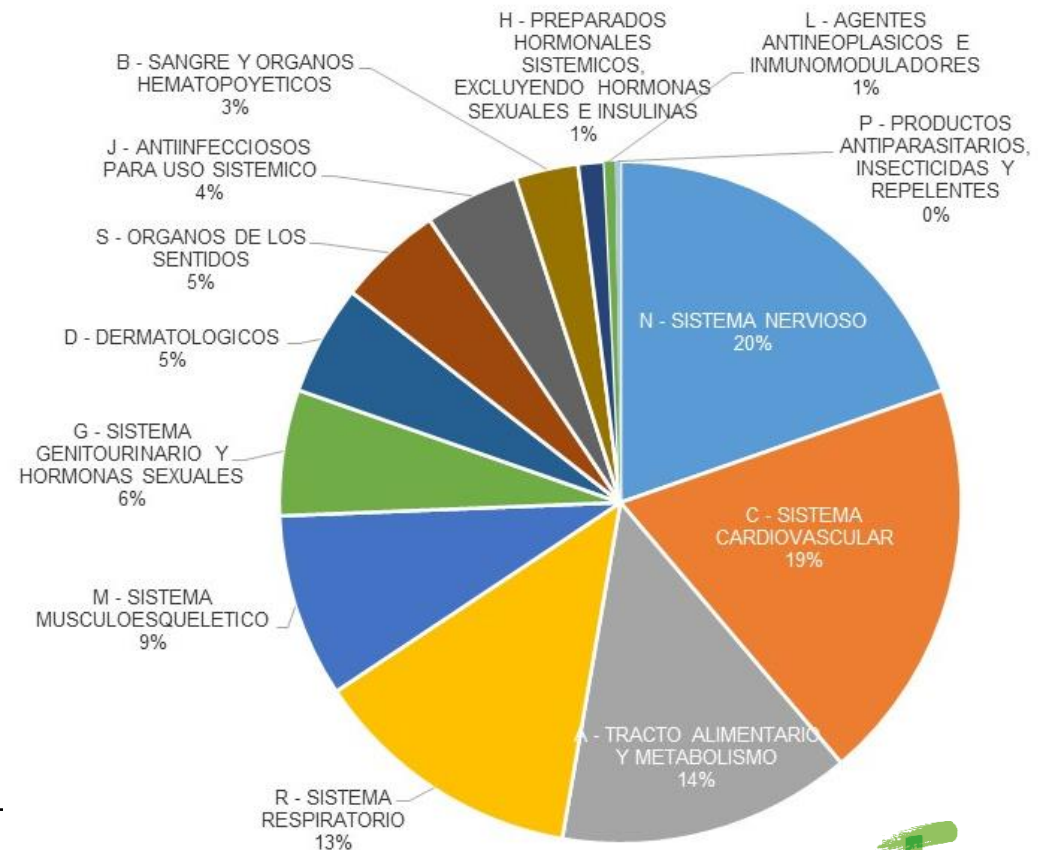

CisMED: 2022 supply incident data

3 out of 4 incidents or alerts corresponded to medicines for the Nervous, Cardiovascular, Digestive, Respiratory or Muscular systems.

- ACEI-type anti-hypertensive drugs (8%)
- Anti-inflammatories (7%)
- Analgesics (7%)
- Anti-psychotics (6%)
- Drugs for coughs and colds (5%)
- Hypolipidemic drugs (5%)

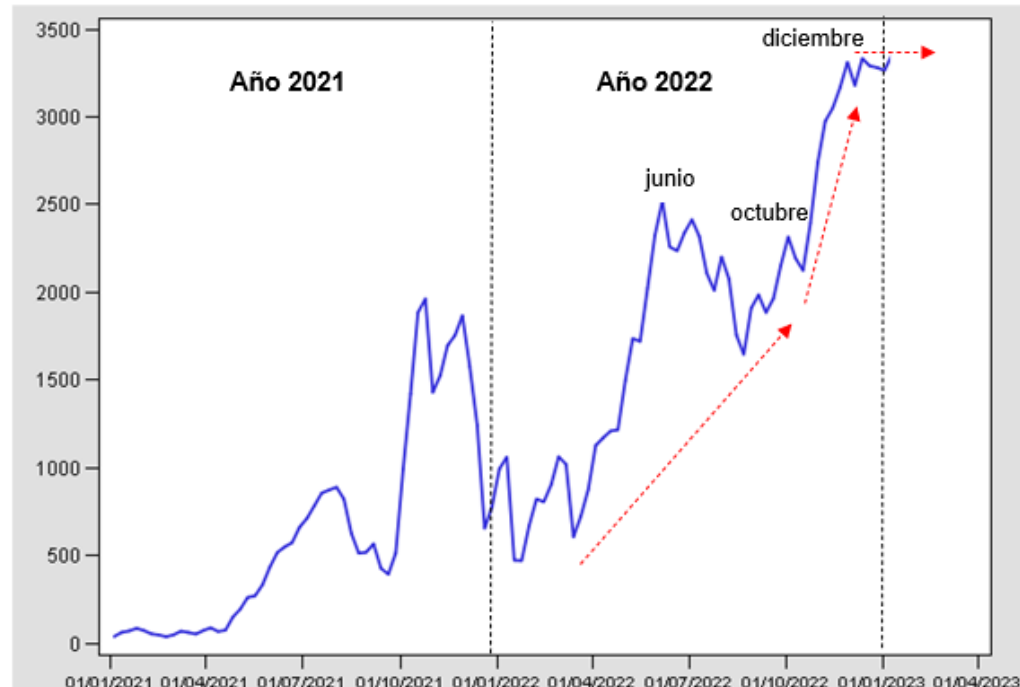

Breakdown of medicines with supply incidents by drug class

CisMED: 2022 supply incident data

MONITORING ANTIBIOTIC MEDICINES WITH PAEDIATRIC AMOXICILLIN

There was a significant increase in supply shortages of antibiotics with paediatric amoxicillin in 2022 which has continued into the start of this year

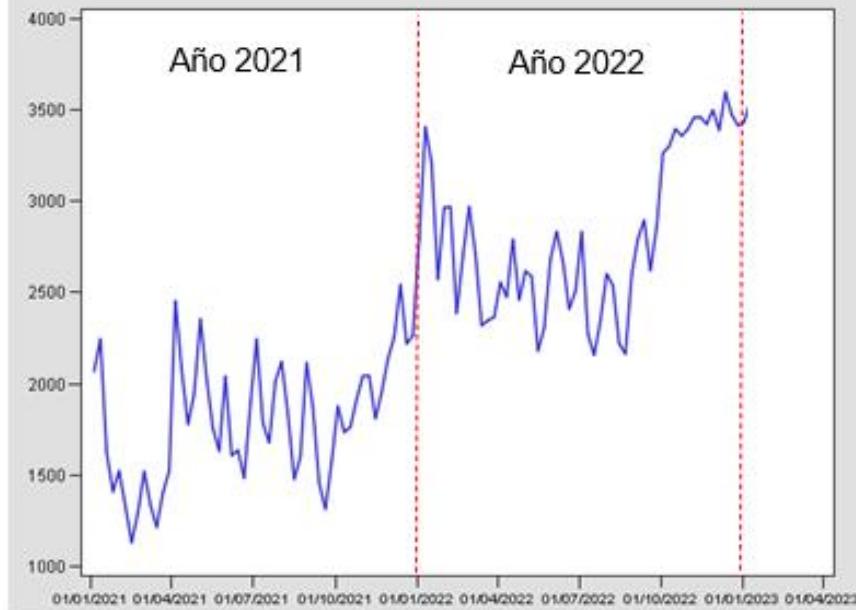

No. of pharmacies with
paediatric amoxicillin
shortages

Si no lo tienes, FarmaHelp lo encuentra

A tool that allows the pharmaceutical community to **contact other pharmacies in their area** when a patient needs a medicine or when the medicine is not available due to emergencies or supply incidents.

- **Free** service
- **Non-invasive** tool
- **Pharmacy-led application**, created by the Organisation of Pharmaceutical Colleges
- **Creates a link** between Colleges and Pharmacies
- **Minimises the impact** of medicine shortages

Si no lo tienes, **FarmaHelp** lo encuentra

Únete a **FarmaHelp** y podrás responder a peticiones de medicamentos de otras farmacias y crear tus propias solicitudes, con una **herramienta gratuita y no invasiva** de la Organización Farmacéutica Colegial, que **no monitoriza tu stock**.

La **Organización Farmacéutica Colegial** ha desarrollado la herramienta **FarmaHelp**, que pone a disposición de todas las farmacias, para ayudarte a ti y a tus pacientes a localizar el medicamento si no dispones del mismo, en caso de urgencia.

¿Te preocupan los datos de tu farmacia?

**Confía en tu Colegio,
confía en tu Organización**
